TRACK-LAYING GANG STARTED

On the Tofield-Calgary Branch of the G. T. P. -- Road Expected to be Completed by July 1st. -- Big Expenditure by the Railway Companies in Alberta this Year.

Saturday morning of last week a gang of over two hundred men were taken south to start work on the track-laying machine, and the laying of steel will proceed with all possible despatch. Every day supply trains are running to the front carrying ties, steel and other building material, and the large gang of men now working on the road will be increased at once. About ninety miles of track remains to be laid, and nearly all of this graded. Several bridges have to be built, and there is bound to be several other delays, but it is fully expected that Calgary will be reached about July 1st.

The completion of the Tofield-Calgary line will be eagerly looked for, as it is considered one of the most important lines in Alberta. All towns along this road will reap a huge benefit and none more so than Mirror. It will provide an outlet for most of the stock shipped from this district, besides giving a more direct route for shipments coming from the South and West, which will mean a great saving in freight.

Eight hundred miles of new track and grading work, involving expenditure of \$20,000,000, will be built by the three great railroads, the Canadian Pacific, Canadian Northern and Grand Trunk Pacific, throughout the province of Alberta before the close of 1912. This network of new lines which will cover almost the whole area of the province from north to south, and east to west, will offer the future a more adequate means of shipping their crop to those sections located in the district hitherto devoid of railroad facilities.

This year the railroad companies are faced with two most serious problems—shortage of labor and steel rails. The former will be one which always presents itself at this season of the year, just when the contractors are preparing to get large gangs of men together, to start them on construction work. However, 1912 holds the situation even more complicated than before, -- due to the extraordinary development of the west during the past year. (Continued on Page 8.)

CLEANING-UP SEASON

The advent of Spring accompanied by sunnier weather always brings with it a feeling of cleanliness and some of our citizens are yielding to that feeling and are raking up the rubbish which has accumulated around their premises during the winter months. In older towns this cleaning-up is compulsory and the residents are compelled to clean up their

back-yards and do away with anything constituting an unsanitary condition of the town. Of course the town of Mirror is just beginning, but it is not too early to make a start.

Another thing that would help to beautify the town would be a little paint (not red paint). This has the effect of giving newcomers to our town a favorable impression of the tastes of the inhabitants. It also gives the town a prosperous and substantial appearance, and is a strong evidence of the faith the citizens have in the town of Mirror. Irrespective of this is the fact that paint is a great preservative and prolongs the life of a building at least twenty years at least. Another fact that should not be lost sight of is that the building is worth a good deal more with the addition of a coat of paint, and it also covers up a number of defects.

5 Roomed House

For Sale

This building is now, and all rooms are papered. Will sacrifice for cash; also guarantee an occupant for the next four months. Apply to CANADIAN BANK OF COMMERCE, 25-11 Mirror, Alta.

Stallions for Sale

One Percheron Stallion, coming 7 years old; weight 2150. One French Draft Stallion, 9 years old; weight 2050.

These horses may be seen at the farm of Olsen Bros, S E 14-40-22. Pedigrees furnished and further particulars given by applying to—C. T. ALLEN, Owner, or MELVIN OLSEN, Mgr. Mirror P. O.

CONVEYANCE FOR SCHOLARS

One of the problems this town will have to contend with shortly, and even now the question arises, and that is proper school accommodation. The scholars are now attending Lamerton school which is situated about a mile and a half from the centre of the town. For the present, it is proposed to run a conveyance from Mirror to carry the children to and from Lamerton school until such time as it was thought advisable to divide the district. This plan, however, will cost something, and the outlay could be put to better advantage if the district was divided in the first place and the money expended on a school for the town.

The committee appointed at the Board of Trade meeting will interview the School Board of the Lamerton School District and will make a report at the next meeting of the Board of Trade.

LOCAL EVENTS

Fred. Dowswell has decorated the exterior of his cottage with a coat of paint.

Harold Stephenson attended the Horse Show at Calgary last week.

Frank Tulloch is building an 18 by 60 foot addition to his livery barn on Carroll avenue.

Mr. Sulley, from Nebraska, is expected to arrive any day with 16 horses. He will farm several miles north of Mirror.

J. F. Flewelling will put a stone foundation under his blacksmith shop and storeroom.

Jno. Robb, foreman for the Brown Construction Co., and who was in charge of the construction on the round house here, completed the work this week and left on Wednesday morning for Dauphin, Man. The firm he is connected with has the contract for a \$75,000 stone and brick station for the Canadian Northern railway at that point.

The fishing season closed on Saturday. One follower of Isaac Walton comes very close to receiving a stiff sentence for a breach of the law, but the presiding judge was in a lenient mood and only fined the prisoner the costs of the court.

T. E. Patterson, joint manager of the Calgary branch of the Royal Insurance Co., was in town today (Thursday) on a tour of inspection. Mr. Patterson was favorably impressed with the town of Mirror and looks for big things here in the near future.

Is Mirror going to have a baseball team this summer? It's about time the fans were getting busy and organizing a club.

W. J. Kadlec has applied for a liquor license for the Grand View hotel to be erected on lots 1 and 2, block 10, Mirror. The application will be considered at the annual meeting of the Board of license commissioners to be held at Red Deer, Saturday, May 4th.

J. T. McKie has purchased a fine driver and buggy. Not very hard to guess where Mac will spend his evenings during the summer months.

Dr. Shore, of Bowden, has taken over the medical practice of Dr. Mooney at Alx, the latter going to Consort.

The fair given on Easter Friday netted the Alx Board of Trade \$530.

NEW GENERAL STORE

Mirror will have another general store in the course of two or three weeks, or just as soon as the carpenters can complete the building. Ezra Wilton, of Brookville, is the proprietor and has already a \$6,000 stock of general merchandise on hand waiting for the completion of the store.

The building which is 40x24, is situated on Gilman street, on lot 21, block 17, and will consist of two stories. Mr. Wilton's family will not arrive for a month and they will then occupy the upper part of the building.

PUBLICITY VISITORS

R. C. W. Lett, G. T. P. traveling passenger and colonization agent, is paying a visit to Mirror arriving on Wednesday evening. Mr. Lett is looking over the Mirror Beach property and taking a number of views of the surrounding country.

Accompanying Mr. Lett on his trip is Jewett E. Ricker, Jr., managing editor of "Opportunity," Chicago, who is travelling through the West in the interests of his paper and looking into the possibilities of the different towns throughout the prairie provinces.

BURNING FIRE GUARDS

The northern outskirts of Mirror had the appearance of a fiery furnace, when on Wednesday evening the citizens turned out to burn a fire guard around the town as a preventative against prairie fires spreading to the stores and houses. There is no protection in town against a conflagration, outside of the ever-ready bucket brigade, and the burning of the dry prairie grass and dead bushes in close proximity to the town will do away with one of the most dangerous causes, in case a fire happened to start near the town. Fire Chief Mitchell is doing good work, and every resident should turn out and give a helping hand. An ounce of prevention is worth a pound of cure.

BOARD OF TRADE

The semi-monthly meeting of the Mirror Board of Trade convened at J. F. Flewelling's, on Tuesday evening. The President occupied the chair; minutes of the last meeting were read and adopted. Correspondence on hand was then read, the bulk of it being enquiries from parties all over the continent. The Secretary and Asst-Sec. were instructed to answer same.

The By-laws came up for a second reading and were passed on motion of N. H. G. Ruthven, seconded by C. T. Allen.

A committee of three, viz., N. H. G. Ruthven, W. D. Cook and J. N. Mitchell were appointed to interview the Board of Lamerton school, with a view to solving the school question for Mirror. Board then adjourned.

THE FARMER A BUSY MAN

Spring work is well under way in Saskatchewan and reports indicate that there was comparatively little fall plowing done in most of the districts but as high as 100 per cent in some districts will be the in-

GREAT DISASTER IN MID-OCEAN

Thirteen Hundred People Go Down on the Ill-Fated Steamship "Titanic." Chas. M. Hays, President of the Grand Trunk Pacific Railway Among the Missing

One of the greatest marine disasters in history occurred on April 15th, when the Titanic, one of the biggest steamships sailing the ocean rammed into an iceberg and thirteen hundred and forty one found death in a watery grave. Eight hundred and sixty-eight survivors, mostly women and children, were rescued by the Carpathia and will reach New York today (Thursday). Two other steamships, the Virginian and the Parisian were expected to reach the scene of the disaster in time to save the passengers on the ill-fated Titanic, but wireless messages received by the steamship companies dispelled this belief, both ships reporting that they had arrived too late to be of any assistance.

Men famous in the political, literary and artistic world of two continents, in the sphere of finance and of international affairs, women the most eminent in the social circles of Great Britain and of America, were among the passengers who went down with the ill-fated White Star liner. The names of Col. John Jacob

Astor, Isidore Straus, millionaire merchant; Geo. B. Wilder, of Philadelphia; Major Archibald Butte, aide to President Taft; Francis D. Millett, the American artist; Wm. T. Stend, journalist, London; Benjamin Guggenheim; Chas. M. Hays, President of the Grand Trunk Pacific, are among the most prominent names missing from the list of saved.

Aboard the Titanic were hundreds who looked forward to a new life in America with long eyes, to relief from age-long oppression, wronged men, to the amassing of a fortune or a competence in the new world. Scores were returning blasé from a winter spent in a whirl through the winter pleasures of Europe. Death, the leveller, brought a common emotion to all—the emotion of fear and the sense of impending death. The Titanic herself lies buried two miles beneath the ocean's surface, midway between Sable Island and Cape Race. The boat was insured at Lloyd's for \$5,000,000, and the cost of building the great liner is estimated at \$10,000,000.

crease in acreage under crop. In many of the cases seeding and threshing will be carried on at the same time, a lot of last year's crop being still unthreshed.

The past four weeks of sunshine have put the soil in Alberta in excellent condition for spring work and judging by reports dicing and seeding is general throughout the province although some of the far-

HUNTING THE WILD GEESSE

It is necessary for sportsmen to have a licence before hunting wild geese, consequently application should be made as soon as possible to a game guardian so that sportsmen may be protected against the pains and penalties arising out of the breach of the law.

Any licence issued now for the purpose of hunting wild geese will be good for the balance of the year, and the licensee may hunt game birds during the open season for the same.

HOMESTEAD REGULATIONS MAY BE CHANGED

Owing to the alarming shortage in the cattle market, it is stated on good authority at Ottawa, that the Hon. Robert Rogers has decided on certain changes in the homestead regulations. The change which is anticipated is particularly a revision to old regulations whereby the homesteader might perform his duties by raising a specified number of cattle each year on his land instead of plowing. In Alberta especially it is contended that mixed farming is desirable. This alternative, it is pointed out would further encourage it and at the same time the live stock industry, now on the wane, would be stimulated.

Another argument advanced in favor of this change is that it would encourage the settlement of scrublands, where cattle can be raised profitably but where at the same time, the expense of breaking the necessary acreage each year prevents a speedy settlement.

FORESTRY BULLETIN

The survey party sent out by the Forestry Branch of the Department of the Interior to explore the country around Lesser Slave Lake, Athabasca, has found that here, as elsewhere throughout the northern forest country, a greater part of the merchantable timber has been destroyed by fire. The whole country was originally covered with the dense growth of white spruce, black spruce and lodgepole pine which have appeared to have escaped fire up to 1865. Fires which have started since that date have denuded large areas, timber which has escaped fire shows that the previous forest was both dense and valuable. The forest here produces occasionally as much as thirty thousand feet, board measure, of timber per acre. This is a great quantity that is found in either Manitoba or Saskatchewan.

The survey party reports that around Lesser Slave Lake there is a large area of land too

high and hilly for agriculture. This land is admirably situated for the production of spruce and lodgepole pine timber. In order that it may be properly managed in the future and protected from fire, the Forestry Branch is seeking to have it set aside as a permanent forest reserve.

The timber from such a forest reserve would be assessable to the Edmonton district. It could be floated down the Athabasca river to Athabasca Landing, and then carried down by rail at a comparatively low cost.

USE THE FANNING MILL

Now is the time to get right after the seed you are going to sow this spring. Most farmers realize that these are an important factor in the growing of a profitable crop, but perhaps some do not realize that it is the important one. The adverse weather condition of the past season have left us with grain in a conditions that commands the attention of every farmer in the country, and seldom, if ever, before has there been such urgent need of the use of the fanning mill on seed grain as this spring. Much of the grain this year is weak in germination, and it is taking a great risk in attempting to grow wheat or oat plants from small shrivelled seed. Remember that the food required to bring the young plant to the surface of the ground, is stored in the seed grain, and that is one reason why plump seed will produce a stronger stand than small or damaged seed. It has been proven time and time again that heavy, plump seed will give a heavier yield in the field than small seed and also that plump vigorous seed produces strong healthy plants that resist ~~some and other diseases~~ more readily. If your seed is not yet cleaned, get busy, and put it through as many times as you can. If you think it is cleaned well, look again and be sure. There is so much work to be done on the field this spring that the chances are that cultivation may not be the most thorough, consequently there is every reason the seed should that be especially well cleaned this season.

JOURNALETTES

The only handkerchief a woman will pay a lot of money for is one that can't be used for what it is supposed to be for.

These is something in leap year after all. A New Jersey barber who inherited \$10,000 has received four hundred offers for his heart, his hand and his money.

It has been stated that to St. Paul goes the credit of having started the first banking system for it is written that he "lodged in the house of one Simon, a tanner." This is an error as an earlier transaction even than that took place, when Pharoah received a check on the Bank of the Red Sea, which had formerly been crossed by Moses & Co.

The preacher who referred to a baby as "a wave on the ocean of life" might have been nearer the mark had he said "a fresh squall." It is alleged that a young man near Alix who had just married suggested to his wife that they should argue some question fully and frankly every morning. This, he thought, would help them to gain a fuller insight into each other's nature, thus making for increased happiness. The first question happened to be: "Can a woman dress on fifty dollars a year?" He took the affirmative and when last seen he had climbed up into the hayloft and was pulling the ladder up after him.

TRACK-LAYING GANG STARTED

(Continued from Page 1.)

Sixty thousand men are required to carry on the work in the west, but whether that number can be obtained is at present very doubtful.

The shortage of steel rails is almost as serious. The Grand Trunk Pacific alone was 18,000 tons of steel rails short on its last year's orders and similar conditions prevail with other roads.

The most important work to be undertaken by the company in the province this year, is the completion of the Toileld-Calgary branch. E. J. Chamberlain, vice-president of the company, states positively that the grading on this line will be completed into Calgary by July 1st. The track-laying machine will follow closely on the heels of the grading outfit, and it is expected that the whole line will be finished and handed over to the operating department by the close of September. It was hoped at one time that the road would be completed before this date, but the company has been held up with its steel rails. To date 107 miles have been laid on the road.

Another line of the G. T. P. which is slowly but surely wending its way into Alberta, is the Cutknife branch, running from Battleford through Cutknife to Wainwright. That the line will be completed to a short distance across the border is the announcement made by the vice-president, but whether it will be carried well into Alberta by the close of 1912 is a question to be decided by the steel and labor problems.

Considerable headway will also be made with the Biggar-Calgary branch, which has 60 miles from the east end, already graded and ready for steel. Another 40 miles of grading is nearly completed and steel will be laid on the whole 100 miles immediately, thus bringing the line across the border into Alberta, and well on to its ultimate destination.

which will be Birchen, on the Toileld-Calgary branch.

Steel-laying has commenced on the G.T.P. Regina-boundary branch, a large gang of men being engaged in the work. It is expected also that steel laying will shortly commence on the Regina-Moose Jaw line, the grading of which is all but completed.
